Staff Race Equality Forum – 13th May

Points arising from group discussion on: Internationalising the learning experience for all students:

- Create open and friendly for a in the Departments so students and staff participate.
- Employer sponsor speaker programme
- Placements for students
- Find a way of saying to all students that this is an opportunity to make lifelong international friendships and networks.
- Curriculum enhancement: where possible to include the issues in teaching/learning – scenarios etc.
- Ensure course evaluations include the opportunity for specific feedback from international students.
- Set up degree course which runs in UK and abroad (eg. India) which adds value to a degree.
- Teaching staff run part of their degree course in the UK and also internationally.
- Use students returning from a gap year – benefit from their experience.
- Great idea to bring in international employers to speak with students.
- Get home students to see the value of internationalisation.
- Creative thinking about ‘integrated’ events to encourage participation across cultures both in departments and colleges.

May 2008.
