

Where will your degree take you?

Dear Offer holder

With the first term drawing to a close, the Environment Department continues to go from strength to strength.

Over the last 3 years, applications to study with us have increased by an average of 11% per year and we recruited over 100 students into our first year in October.

The QS Subject Rankings 2012 placed York in the top 30 universities in the world for Environmental Sciences and in the top 5 in the UK.

New field trip to Iceland

Following on from the success of our yearly field trips to the Lake District and Tenerife, we're adding a new destination: Iceland.

In June next year, we'll be introducing a new module entitled 'Glaciology and Volcanism in Iceland'. This exciting new module is based on an 8-day trip to Iceland where we will work on glaciers, volcanoes and also some of the hazards associated with these aspects of the natural environment.

Maximise your employability

As a York student, you'll have access to a wide range of support to help you develop your skills and maximise your employability.

Established schemes such as the [York Award](#) and [York Students in Schools](#) are highly regarded by employers and there's also a central internship bureau run by the [University Careers Service](#). All first year Environment students take part in a [week-long employability activity about future flooding](#), giving you the ideal opportunity to develop both links with employers and your workplace skills.

Timely and informative feedback

We're committed to giving you timely, comprehensive and transparent feedback on your work.

With this in mind, we've recently collaborated with several current students to redesign our feedback forms. We've also redesigned our evaluation forms so that you can give us faster, more focused feedback. We'll be posting our responses in our online learning environment, so you'll be able to see how we address your comments.

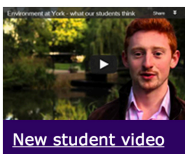

Professor Callum Roberts received the [Mountbatten Maritime Award](#) for best literary contribution for his book [Ocean of Life - How our seas are changing](#)

Acacia in East Africa

New study led by [Dr Rob Marchant](#) suggests protected areas in East Africa are not conserving plants such as the iconic [Acacia tree](#)

New student video
