HOW TO PRINT ELECTRONIC JOURNAL ARTICLES FROM JSTOR ON THE UNIVERSITY'S STUDENT NETWORK

Faults in the versions of Internet Explorer and Adobe Acrobat Reader currently installed on the campus network are currently causing printing problems on student classroom PCs.

To avoid these problems, please follow these instructions.

If you still experience difficulties, contact the IT Services Infodesk in person; or by phone (ext 3838); or email itsupport@york.ac.uk

Once you have located the article that you want, click on the title to see the full text of the article.

JOHN M. TAUREK Should the Numbers Count?

First page of article

At the top of the page there are the following options:

[PRINT](#) | [DOWNLOAD](#) | [CITATION/STABLE URL](#) | [TABLE OF CONTENTS](#)

(NB the **Print** option will not work on the student network)

First of all, you must save the article as a file in your filestore area (drive H:). Click on **Download**.

This is the next screen:

Select a format for downloading:

If you have a preferred format, you may choose to bypass this page by setting your downloading preference. JSTOR preferences may be set by selecting the "[Set Preferences](#)" option at any time. **PDF format is recommended for most users.**

Accessibility Option - TIFF Format:	PDF Format (Recommended):	PostScript Format:
<p>NOTE: If you are not prompted with "File Download" dialog box, you can right-click (Shift-F10) the link in order to activate the context menu. Click or arrow down to the "Save Target As..." option. Ensure that the file is saved with a .tif extension, rather than .tiff.</p> <p>Accessibility Option - TIFF Format - This image based file type is designed for use with assistive technology such as document scanner/readers like Kurzweil, OCR programs, or screen magnifiers. Learn how to use this option.</p>	<p>NOTE: If you are a Windows user, right click the desired format and select "Save Link As..." (in Netscape) or "Save Target As..." (in Internet Explorer). If you are a Mac user, click and hold the desired format (or ctrl + click in OS X) and select "Save this Link as..."</p> <p>PDF High Quality - Larger file size with high-quality resolution.</p> <p>PDF Economy - Smaller file size with fax-quality resolution.</p>	<p>PostScript Format - This option is preferred by some users of UNIX workstations, and requires the use of a PostScript viewer.</p>

You are recommended to use the **PDF High Quality** format. You could first of all try the **PDF Economy** format, which will show you on screen what the page will look like when printed; if this is fine, then save as that format, which will take up less space on your drive H: However, it is likely that PDF High Quality will be what you prefer. Take these steps:

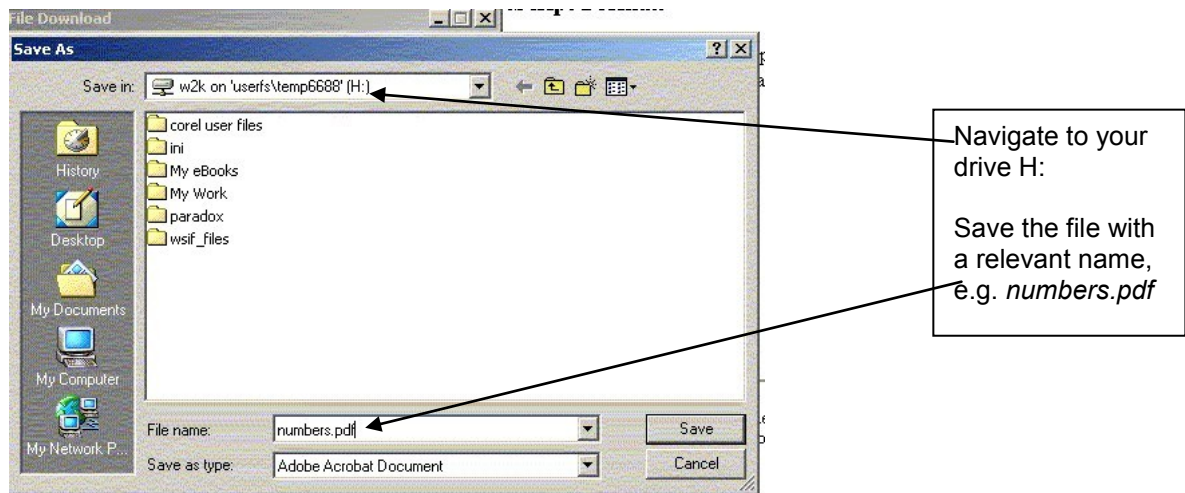

- Right-click on the **PDF High Quality** link.
- This small menu will appear :-

- Left-click on **Save Target As**

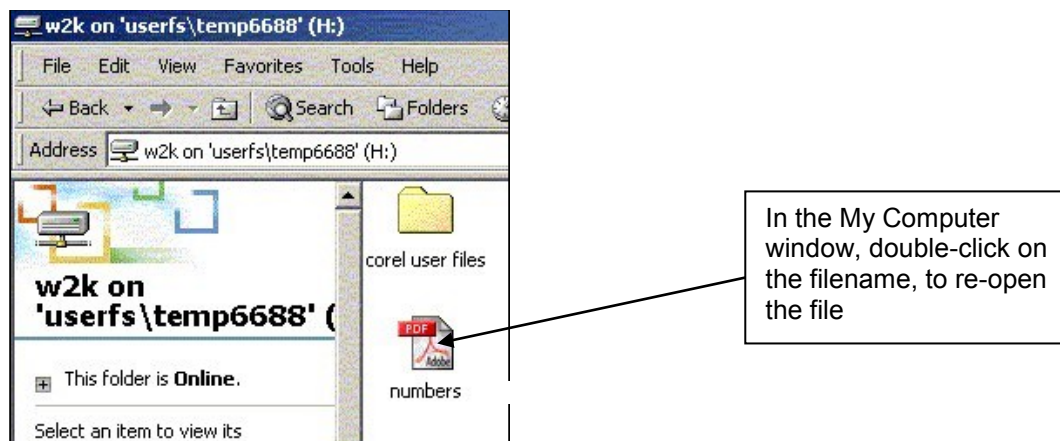

The usual **Save As** window will appear:

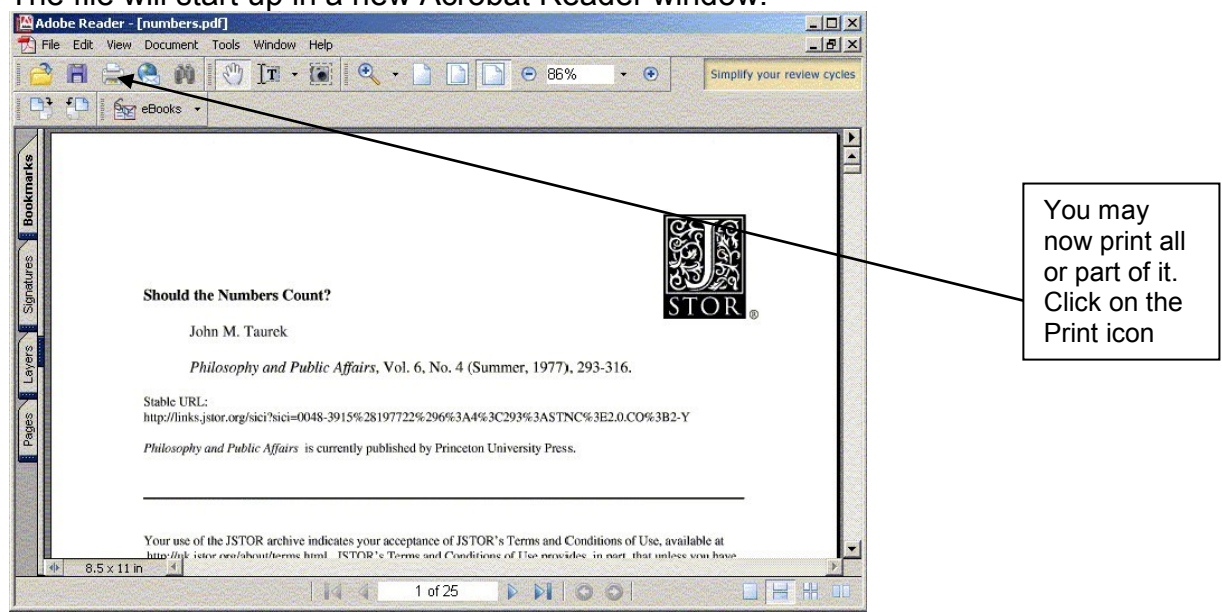

JSTOR JSTOR JSTOR JSTOR JSTOR JSTOR

You must now **close down Internet Explorer**, and re-open your saved file from **My Computer** (this is necessary because of the network problems)

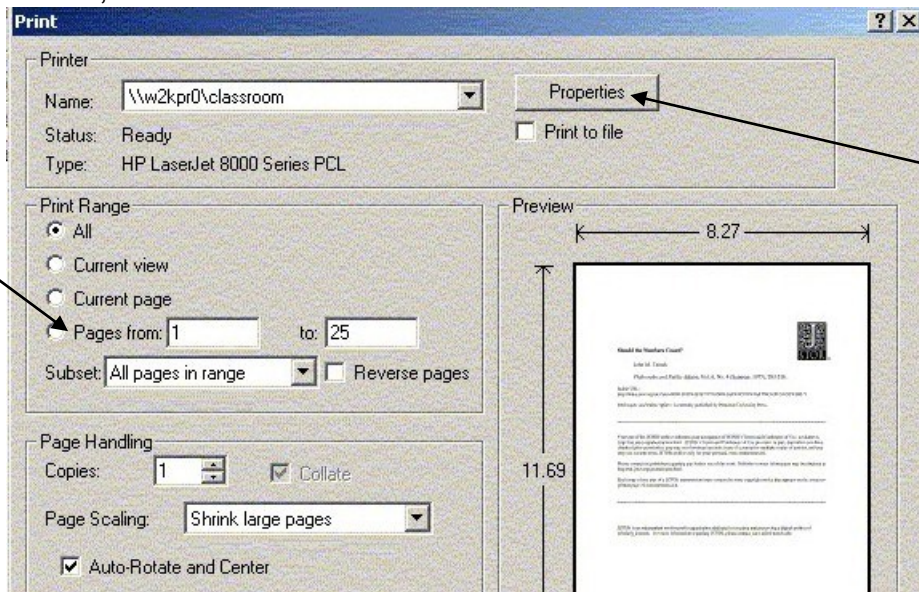

The file will start up in a new Acrobat Reader window.

JSTOR JSTOR JSTOR JSTOR JSTOR JSTOR

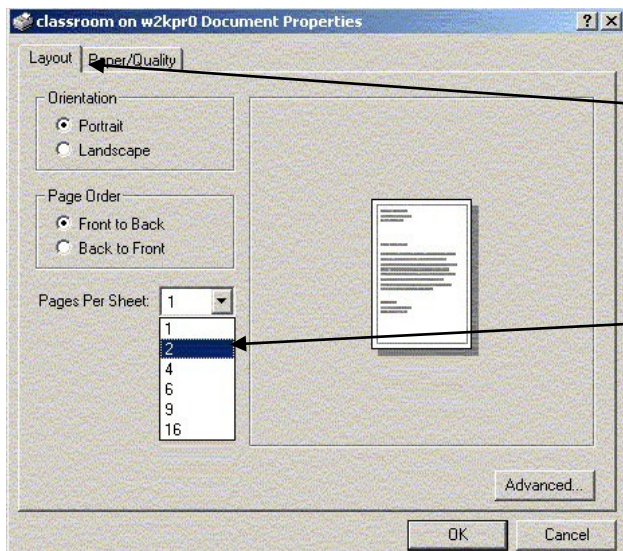

To economise on printing charges, it is possible to print to two pages on one printed sheet, as follows:

1. Select the pages you want to print.
Note this is not the same as the page numbers in the journal, it is the number of pages in the file.

2. Click on the **Properties** button. This is where you can choose to print two pages on one sheet.

Printing two pages on one sheet:

Click on the **Layout** tab

Select two pages per sheet. Click on OK, and on OK at the next screen

You may now collect your printout from one of the classroom printers on campus.

Finally, remember to go to **My Computer** and delete the file from your H: drive, because it takes up a lot of space:
