

**HEALTH, THE BODY  
AND THE E-SOCIETY SYMPOSIUM**

**18-19 JANUARY 2007  
THE GRANGE HOTEL, YORK**

**PARTICIPANTS LIST**

## EVENT ORGANISERS

**Roger Burrows** is Professor of Sociology at the University of York. He was the co-editor of the international journal *Housing Studies* between 2002 and 2005 and is a founding member of the editorial board of *Information, Communication and Society*. Together with his colleague, Brian Loader, he is also the co-director of the Social Informatics Research Unit (SIRU). He is also currently the co-ordinator of the ESRC e-Society Research Programme (2005-2007). [rjb7@york.ac.uk](mailto:rjb7@york.ac.uk)

**Michael Hardey** has previously worked at the Universities of Surrey, Southampton and Newcastle. He is currently based in the Hull York Medical School (HYMS). His main research falls into a number of areas including: e-health and in particular the role of the Internet in shaping health beliefs and behaviours, the digitisation of health and social care and the nature of mediation and identity. He part of a Department of Health funded research project investigating the informatisation of services to older people. Mike is also involved in a ESRC e-Society project and an has an ongoing collaboration with the Laboratory of Computational Engineering, Helsinki University of Technology to develop methodologies to understand mediated interactions and relationships. [michael.hardey@hyms.ac.uk](mailto:michael.hardey@hyms.ac.uk)

**Antonia Luther-Jones** Communications and Events Manager.  
[alj504@york.ac.uk](mailto:alj504@york.ac.uk)

**Sarah Shrive-Morrison** ESRC e-Society Research Programme Administrator.  
[ssm500@york.ac.uk](mailto:ssm500@york.ac.uk)

## PARTICIPANTS

**Anne Akeroyd** is a social anthropologist at the University of York. Her current research and teaching interests are mainly in health and the body, especially women's health, and comparative perspectives on gender, especially in East Asia and Southern Africa. Her other interests include feminist and gender issues and social research ethics. She also teaches in the Centre for Women's Studies. [ava1@york.ac.uk](mailto:ava1@york.ac.uk)

**Paul Bellaby** is a Professor of the Sociology Health at the University of Salford where he is also Director of the Institute for Social, Cultural and Policy Research. His central interests currently concern lay encounters with risk to health and safety, how lay might diverge from expert assessments of risk and how to obtain agreement on what constitutes risk. [p.bellaby@salford.ac.uk](mailto:p.bellaby@salford.ac.uk)

**Ann Blandford** is Professor of Human–Computer Interaction and Director of the UCL Interaction Centre, University College London. Her research investigates theory and methods for evaluating interactive systems and relating evaluations to the design and deployment of new technology. Within this broad remit, there are several more detailed focuses, including the design and use of digital libraries in various work settings. Here, the concern is with understanding how professionals actually work, and how technologies support or hinder that work. One important domain for this work has been studying the use of health information resources by clinicians and patients. This work leads to new insights on how to better design and deploy systems to augment working practices and users' experiences. [a.blandford@cs.ucl.ac.uk](mailto:a.blandford@cs.ucl.ac.uk)

**Pamela Briggs** is a Professor of Psychology, Director of the Psychology and Communication Technologies (PACT) Lab and Dean of the School of Psychology and Sport Sciences at Northumbria University. She has recently completed an ESRC project exploring those factors that influence trust in online health advice. She is particularly interested in social technologies, trust and privacy perceptions in computer mediated communication. [p.briggs@northumbria.ac.uk](mailto:p.briggs@northumbria.ac.uk)

**Nik Brown** is Deputy Director of the Science and Technology Studies Unit (SATSU) and Lecturer in the Department of Sociology at the University of York. His research is in the sociology science, medicine and technology with particular reference to the role of expectations, hope and futures in life science innovation. His current work explores new forms of consumption and public engagement with bioscience, including private stem cell banking and the political economy and social organisation of stem cell research. [ngfb1@york.ac.uk](mailto:ngfb1@york.ac.uk)

**Michael Cross** is a freelance journalist who writes regularly for the *Guardian* on social aspects of technology. [michael.cross@fastmail.fm](mailto:michael.cross@fastmail.fm)

**Ulrike Felt** is Professor of Social Studies of Science at the University of Vienna. She has wide experience in running nationally and internationally funded research projects and working with a broad spectrum of social science research methods. She has served as member of the council of the European Association for the Study of Science and Technology (EASST) from 1995 until 1999, and as a member of the Society for the Social Studies of Science (4S) from 2002 to 2004. Since July 2002 she has editor of the international peer-reviewed Journal *Science, Technology, & Human Values* (Journal of the Society for Social Studies of Science). Currently she also serves as an expert in the Advisory Group of the European Commission for the "Science and Society" priority of the 6th framework programme and is leading, together with Brian Wynne, the expert group on Science and Governance. [ulrike.felt@univie.ac.at](mailto:ulrike.felt@univie.ac.at)

**Lisa Gugglberger** finished her studies of Sociology with her master's thesis at the Department of Social Studies of Science (University of Vienna) in 2005. After working as a teaching assistant for the department in 2005 she is currently collaborating in the research project "Virtually Informed" dealing with the Internet in the medical field. In the context of this project she is also writing her PhD thesis. The focus of her theses is put on "informed patients", with special attention on gender specific differences in the approach to online health information. [lisa.gugglberger@univie.ac.at](mailto:lisa.gugglberger@univie.ac.at)

**Ulla Gustafsson** is a sociologist who works at Roehampton University. She has carried out a range of research in the field of health and health care. Her work in primary health care has focused on interprofessional collaboration, the views held by General Practitioners on health promotion and women and alcohol use. She has also explored media reporting of tranquilliser use, young people and alcohol use in Sweden as well as comparing health promotion policies and the use of alternative therapies in the UK and Sweden. [u.gustafsson@roehampton.ac.uk](mailto:u.gustafsson@roehampton.ac.uk)

**Peter Harris** works in the Department of Psychology at the University of Sheffield. His research interests lie in social and health psychology especially work on: responses to health-risk information and self-affirmation. In collaboration with colleagues at the University of Northumbria, he is examining how people use the internet to search for health-related advice and how they subsequently decide to act upon it. [p.harris@sheffield.ac.uk](mailto:p.harris@sheffield.ac.uk)

**Flis Henwood** is Professor of Social Informatics at the University of Brighton. Her early work focused on the gender-technology relation and issues of technology and inequality. More recently, she has been developing social informatics research in the area of health care. Her work is concerned with developing critiques of the 'informed patient' discourse and in exploring the lived experience of ICT use in a range of health care settings and contexts. She has published widely on these issues in social science, health and new media journals. Her most recent project is exploring ICT use in the context of self-care, with a focus on obesity. [f.henwood@bton.ac.uk](mailto:f.henwood@bton.ac.uk)

**Leigh Keeble** has a background in social and public policy and she joined the Department of Sociology at York in June 2006. She is working on 'translating' the findings of the ESRC e-society programme. She is also working on a Department of Health funded project, *Wired for the Third Age?* (with Brian Loader and Michael Hardey (HYMS)). Her research interests are in the areas of community informatics, the use of ICTs by the voluntary and community sector, and the role of ICTs in empowering young people in public care. She is the Reviews Editor for the journal *Information, Communication and Society* (ICS). [lk509@york.ac.uk](mailto:lk509@york.ac.uk)

**Sally Lindsay** is a Medical Sociologist and a Research Fellow in the Institute for Social, Cultural & Policy Research at the University of Salford. She is currently working on an e-society project that examines the impact of ICT on the self-management of heart conditions. Her past research has been funded by the Canadian Institutes of Health Research. Currently, she holds an ESRC seminar series grant on self-care. Sally is also the founder of an International Research Network in Self-Management of Chronic Illness. Her research interests include examining effective ways of engaging patients in self care, chronic illness self-management, e-health, and health inequalities. [s.lindsay@salford.ac.uk](mailto:s.lindsay@salford.ac.uk)

**Charles Meyer** - M St Candidate (Oxford); Member of the Ohio and Maryland Bars, Registered US Patent Attorney and Canadian Patent Agent; BCL (Oxon), JD (Washington College of Law, The American University) MS in Operations Research (George Washington University), BS in System Engineering (University of Virginia). Before matriculating at St Peter's College, Oxford, he served seven years as the Chief Legal Officer of a Nasdaq 100, Canadian high technology company after having previously practised intellectual property law

for a major computer manufacturer and intellectual property, corporate and insolvency law at one of the largest international law firms. He is a co-investigator in an e-Society Programme Phase II project addressing intellectual property ownership of medical data in collaborative computing environments. Charles was the St Peter's College the Berge Scholar for the 2003-2004 academic year. [chasm\\_in\\_oxford@yahoo.com](mailto:chasm_in_oxford@yahoo.com)

**Sarah Nettleton** has research interests in: sociology of health and illness; bodies; running; e-health; and the medical profession. She has worked at the University of York since 1993. Between 1993 and 2006 she worked in the Department of Social Policy and Social Work at York before transferring to the Department of Sociology in September 2006. She is currently the Senior Editor (Medical Sociology) for the journal *Social Science and Medicine*. [sn2@york.ac.uk](mailto:sn2@york.ac.uk)

**Claudia Pagliari** is Senior Lecturer in Primary Care within the GP section of Clinical and Community Health Sciences at the University of Edinburgh. She has a background in psychology and health services research and is mainly responsible for the development of R&D capacity, particularly in relation to e-health. She also has interests in the related areas of patient and consumer involvement, implementation research (issues for behavioural and organisational change), evaluation methodologies for emerging and complex health informatics technologies, and medication compliance in chronic disease (particularly diabetes and asthma), as well as the relationship of research to policy. [claudia.pagliari@ed.ac.uk](mailto:claudia.pagliari@ed.ac.uk)

**Alan Radley** is Professor of Social Psychology in the Department of Social Sciences at Loughborough University. He is the Founding Editor of the journal, *Health: An Interdisciplinary Journal for the Social Study of Health, Illness and Medicine*. He has a broad interest in questions of health, particularly as these bear upon changing conceptions of care and the place of the sick in society. His recent research interests have included the use of photography as a medium for investigating illness experience, including recovery in hospital. Currently he is working on visual representations of homelessness, on the hospital out patient consultation, and on the production and display of images made by ill people. [a.r.radley@lboro.ac.uk](mailto:a.r.radley@lboro.ac.uk)

**Mustafizur Rahman** is Programme Manager, ICT/Begbroke; Directorate and Principal Researcher, Centre for Requirements and Foundations; Member of Executive Committee, Oxford e-Science Centre; and MSc Student in Software Engineering, University of Oxford. His research is on practice driven requirements for industrial applications; requirements engineering in e-Science and e-Social Science; distributed computing environments; grid computing; IPR/legal issues in e-Health. [mustafizur.rahman@exeter.oxford.ac.uk](mailto:mustafizur.rahman@exeter.oxford.ac.uk)

**Kay Richardson** works in the School of Politics and Communication Studies at the University of Liverpool. She did a BA in English and American studies, majoring in Linguistics, at the University of East Anglia, and has an MA and a PhD in English Language Studies from the University of Birmingham. She is the author of a book about the negotiation of health risks online, called *Internet Discourse and Health Debates*, published by Palgrave. [kay100@liverpool.ac.uk](mailto:kay100@liverpool.ac.uk)

**Clive Seale** is Professor of sociology at Brunel University and a medical sociologist with interests in a variety of areas. These include end-of-life decision making and care, communication in medical and other health care settings, mass media and health and the internet and health. His work is methodologically diverse, including statistical and social survey work as well as qualitative work based on text analysis, interaction analysis, conversation analysis and straightforward qualitative thematic analysis. He is currently working on new ways of analysing text using 'corpus linguistics' software, examining interviews and web forums involving people with illnesses describing their experiences,

focusing in particular on gender differences in language choice and experience.  
**clive.seale@brunel.ac.uk**

**Chris Shilling** is Professor of Sociology at the University of Portsmouth. He Studied for BA and MA degrees at Sussex University before completing his PhD at the Open University. Chris also studied for a post-graduate Certificate in Education (Social Sciences), and a Certificate of Curriculum Development in Higher Education. He previously taught at Oxford Polytechnic and Southampton University, and has been a Visiting Professor and Fellow at the University College Dublin, the University of Wisconsin-Madison, and the University of Helsinki. He joined Portsmouth in 1995, and coordinates the European Social Theory research group at the University. Chris also coordinates the International Body Pedagogics Project - involving scholars from Europe, North American and Asia. He has published numerous influential books and articles concerned with the sociology of the body, technology and culture. **chris.shilling@port.ac.uk**

**Liz Sillence** works at the University of Northumbria. After graduating from Aberdeen University in 1998 with B.Sc.(Hons) in Psychology, she moved to Birmingham University where she completed an MSc in Ergonomics and Work Design. She gained a Ph.D. from Birmingham University in 2003 on virtual communities and is now working on the "Bodies Online" e-Society project examining the use of the Internet for health advice.  
**elizabeth.sillence@northumbria.ac.uk**

**Paul Stoneman** is a researcher at Chimera at the University of Essex. He is carrying out statistical research examining how internet use meshes with a range of cultural, social and political institutions and practices. **pstone@essex.ac.uk**

**Ian Watt** trained in medicine at the Universities of St Andrews and Manchester. Following qualification, he specialised in general practice and public health and has worked in a number of different settings both in the UK and abroad. He joined the University of York in 1994 when he took up a post in the NHS Centre for Reviews and Dissemination, and was appointed Professor of Primary and Community Care in the Department of Health Studies in 1997. Currently his main research interests are: communication and health care; effectiveness of health and healthcare interventions; the dissemination of research evidence and professional behaviour change; and patient safety. In addition to his work with HYMS and in the Department of Health Sciences, Ian Watt job shares as a GP principal in the Harewood Medical Practice and an Honorary Consultant in Public Health Medicine with the NEYNL Strategic Health Authority. **isw1@york.ac.uk**

**Andrew Webster** is Director of the Science and Technology Studies Unit (SATSU), University of York and Head of Department of Sociology. He was Director of the £5m ESRC/MRC Innovative Health Technologies Programme, and member of various national Boards and Committees He recently co-ordinated and co-authored the ESRC's Research Ethics Framework. He is currently national co-ordinator of the ESRC's new Stem Cells initiative (2005-8), and is a member of the Royal Society's Expert Working Group on Informatics. His research interests are in the areas of the sociology of science and technology, science policy studies, innovative health technologies and their use, the sociology of innovation, the commercialisation of research, and technology foresight. He is currently undertaking externally funded research on stem cells and the implementation of pharmacogenetics and public confidence in informatics systems. He also has an interest in relating health technology to context of use and the spatial setting in which this occurs, which has led to work on ICTs, ageing and the built environment. **ajw25@york.ac.uk**

**Rob Wilson** is a lecturer in management at the University of Newcastle-upon-Tyne Business School and is a member of the Centre for Social and Business Informatics (SBI) part

of the university's Institute of Policy and Practice (IPP). With ten years informatics experience, he has lectured widely on information systems in public sector contexts and is leader of the undergraduate business information systems module. His research interests are on public sector informatics, particularly the development, implementation and evaluation of information systems. Previous work has included the design and evaluation of information systems in healthcare including projects for the Department of Health on patient records, decision support and electronic prescribing. **rob.wilson@ncl.ac.uk**

**Marlene Winfield** is National Patient Lead for NHS Connecting for Health and a member of its Board. She is on the NHS Direct New Media Committee and the Centre for Public Scrutiny's Advisory Group. She has recently joined the ESRC e-Society Programme Advisory Group. Before joining the NHS, Marlene was Head of Policy Research and Strategy at the National Consumer Council, working particularly in the areas of data protection, freedom of information, and civil justice. She advised on radical reforms to make the civil justice system more accessible to citizens. She also chaired the Litigant Information Sub-Committee of the Civil Justice Council. She was made an OBE in 2000 for services to civil justice reform. She was a founder and trustee of Public Concern at Work, a free legal advice centre that helps employees and employers deal with ethical dilemmas at work. The NHS is one of its biggest customers. For ten years, she was an adviser to the UK's biggest ethical investment funds, Friends' Provident's Stewardship. **marlene.winfield@cfh.nhs.uk**

**Sally Wyatt** is a Senior Research Fellow at the Virtual Knowledge Studio in Amsterdam. She did her BA and MA in economics at, respectively, McGill University (Montreal, Canada) and Sussex University (Brighton, UK). She received a PhD in Science and Technology Studies from the University of Maastricht (Netherlands). She has more than 20 years experience in teaching and research about technology policy and about the relationship between technological and social change, focusing particularly on issues of social exclusion and inequality. She has worked at the Universities of Sussex, Brighton and East London. Since 2000, she has been based in the Department of Communication Studies at the University of Amsterdam. She also co-ordinates PhD training in the Dutch Research School for Science, Technology and Modern Culture (WTMC). She was President of EASST (European Association for the Study of Science and Technology) between 2001-4. She has acted as an adviser to research funding agencies in the UK, US, Netherlands, Finland, Norway and Germany. Together with Andrew Webster, she is editor of a new book series, Health, Technology and Society (Palgrave Macmillan). **sally.wyatt@vks.knaw.nl**

**Sue Zeibland** works at the University of Oxford. She is a medical sociologist with a particular interest in qualitative research methods. She is research director of the DIPEX research group, which conducts qualitative interview studies for a multimedia website [www.dipex.org](http://www.dipex.org). She has published over 60 peer-reviewed research papers and written several articles and chapters on qualitative research methods, especially analysis of qualitative data, and runs regular courses in qualitative research methods (with colleagues in the DIPEX research group). Other current research interests include analysis of illness narratives, emergency contraception and internet use by people with serious illnesses. **sue.zeibland@phcpc.ox.ac.uk**
