Sources: Answers to Parliamentary Questions 16/7/91 and 2/2/94, Housing Statistics, Cm 2507, Cm 280, Cm 3207 & Cm 3607, CLG and CORE websites.

Notes: For the years up to 1989/90 the lettings figures are Department of the Environment estimates. It should be noted that new housing association tenants include former council tenants transferring to a housing association letting. Stock figures are for December for years up to 1989/90 and for March for later years. Figures for the years from 1990/91 are all derived from CORE. Lettings to the homeless do not include lettings on non-secure tenancies for which no breakdown is available. Lettings figures are for general needs and do not include supported housing. The definition of supported housing changed for 2004/05 reducing the number of lettings defined as general needs.
