Katherine

Université de Lille, France

My time in Lille has certainly been an experience in which I have learned many things that I will take forward with me. Many parts of the study placement have been enjoyable, especially some of the modules that I chose, as this gave me the opportunity to study things that I wouldn't necessarily have the opportunity to do in York. One of the most rewarding feelings is sitting through a complicated 2 hour lecture in French and realising that you actually understood near enough all if it. Lille also has great opportunities to travel either independently or with the university.

I would say to future students to take multiple copies of all forms as they are often lost. I also found it helpful to talk often with people at home if you’re struggling at all as they can be a great source of support!
