What’s it like to study there?

“My first impressions have been almost entirely positive, people are very helpful and many events have been laid on to help with orientation. Despite not having university accommodation, I have found it easy to find a large group of friends.”

“So far I have experienced very little culture shock. To ensure that it didn’t become an issue, I got involved with as many different activities as possible. By doing this, I made a good group of friends, all of whom are in the same boat as myself, meaning we could give each other support with any...
Edward, Politics Student, Year Abroad 2017/18

“I am having a complete blast at HKU and have adapted to the learning environment. I love how interactive the lectures are and how they are discussion-based. Every day, I am in a constant awe of how beautiful the university campus and scenic views are. It still surprises me that the campus is bombarded with escalators and lifts. Only a few months into my study abroad experience, I can truly call Hong Kong my ‘home’. To be in such an exciting city that resembles London in some ways, it feels great to call another city ‘home’.

“I did not think it could be possible for my mind-set to change in such a short amount of time. You do not realise the flaws you have in your mind-set until you shift out of your comfort zone and into a new environment. Battling my ignorance’s and prejudices has been rewarding where I can now view the world outside of all the assumptions I have built up over the years. Having met all the kinds of people from across the world triggered this process. I have met some of the most amazing, intelligent and open-minded people that have truly made this experience incredible. I feel like I have travelled across the world simply through conversations. In addition, physically travelling to nearby countries has developed my confidence, self-esteem, awareness and street understanding.”
