About this book

This book provides general guidance to applicant for the BA (Hons) Architecture on efficiently compiling and submitting a portfolio of work as part of their application. It is a rough guide on what may be included in the submitted portfolio and how you may present it to showcase your skills.

The book also provides, via the displayed images, examples of sketches and drawings for inspiration.

This is not a design or design process guide; the document assumes the design work has already been done, or will be done, and needs to be communicated.

This is not a guide to technical or analytical architectural or urban studies. Any buildings or spatial contexts drawn herein are simplified for demonstrational purposes; they are not drawn to scale.

The book represents the opinions and preferences of the authors. The provided guidance should be read as suggestions and advice, and not to be perceived as a dictating template for submitted portfolios.

Any feedback on the content would be most welcome.

1. Why Portfolio?

Academic grades are important, yet we believe that they are not enough to showcase your full strengths. At The York School of Architecture, we don’t just want to know if your skills are sufficient for studying architecture, but, more importantly, we want to know if architecture is good for YOU!

The portfolio allows you to showcase your skills beyond the rigid academic grades and allows you to demonstrate your passion and readiness to study Architecture! We are not just looking for artistic skills, but we are equally interested in applicants skilled in creative thinking, problem-solving, presentation, leadership, and any other skills that you can demonstrate are relevant to Architecture.

Eligible candidates for our BA (Hons) Architecture programme will receive an email inviting them to submit a digital portfolio of their work as part of the application process. If you are invited to submit a portfolio, please consult the guidance provided in this document as a reference. Following review of this portfolio you may be made an offer directly or you may additionally be invited to an interview.
2. YOUR portfolio

Your portfolio should demonstrate creative thinking as well as technical ability.

Freehand skills are valued in architecture, therefore sketches showing creative thinking and ideas are particularly relevant, as well as 3D work such as sculpture or physical models.

Typically our applicants will be studying art or design A-level subjects (or equivalent). We will also consider applicants following courses of study that do not include art or design but that engage our physical or social environments, such as geography and philosophy, for example. These students need to demonstrate their interest and skills in art or design beyond their formal studies.

All applicants are invited to share their interest in seeing, interpreting and communicating the world around them through drawing, alongside their other visual interests, in their digital portfolio.
3. Specific guidelines

• Submit your portfolio as a pdf file
• Your portfolio should be presented clearly. Please carefully curate the content, including headings and annotation where necessary.
• Be selective and consider pieces that best highlight skill and reflect your interests – note that portfolios that include too much information can lose focus.
• Where possible, highlight development work that leads to a final piece as process work is valued highly. We do not need to see everything – be selective and curate the portfolio with care.
• Freehand skills are valued in architecture, therefore sketches showing creative thinking and ideas are particularly relevant. If you have drawings or other graphic representations which have been developed using any type of software, these can be included.
• Your portfolio may comprise materials from an art or design-related A level, or other relevant work. You can include work created in your own time as well as work produced on creative courses.
• Please include photographs of physical works such as paintings, models, 3D work, etc. Images should have a clear title and date of completion. If the size of the work is not obvious, please state this in a caption.
• If you don’t have access to a large-scale scanner, good quality photographs of your artwork can be sufficient.

We advise that you submit a digital portfolio of a minimum of 10 pages and a maximum of 20 pages in length and contains pieces of work that best show your ability with a broad range of representational techniques.
4. Expected content

We look for a range of different creative skills, which may include:

- scanned sketches / process work
- photos of work in progress
- creative writing
- precedent studies or case studies
- concept sketches
- hand-drawn sketches of places, spaces or buildings
- life drawing
- photographic studies
- collage or mixed media works
- paintings
- abstract art works
- analytical drawings/mapping drawings
- orthographic drawings (such as plans, sections and evaluations)
- measured drawings
- computer-aided design (CAD)
- images made in Photoshop or other software
- graphic design
- product design
- website design (include screenshots)
- original small-scale 3D work: sculpture, installations, models
- photographs of physical models.

This list is not exhaustive and if you have work that shows your creative skills which are not listed, we encourage you to include such work.
5. Project selection

• Carefully curate your projects to showcase a diverse range of skills and experiences.

• Include a mix of academic assignments, personal projects, and any professional work or internships, if applicable.
6. Narrative flow

- Organise your portfolio in a logical and visually appealing sequence.
- Create a narrative flow that guides the viewer through your thought process and evolution as a designer.
7. Detail and Depth

• Balance breadth and depth in your portfolio.

• While presenting a variety of projects, delve into a few key ones [at least one project] with more detail, emphasising your design thinking and problem-solving abilities [we are equally interested in ‘how you think’ as much as ‘what you produce’].
8. Contextualisation

- Provide context for each project by briefly explaining the background, objectives, and any relevant constraints or challenges.
- Clarify your role in group projects (if any) and emphasise your individual contributions.
9. Reflection and learning

- Include a reflective component for the main project(s) that you present; where you discuss what you learned, challenges you overcame, and areas for future improvement.
- Demonstrate a growth mindset and a commitment to continuous learning.
10. Technical proficiency

- Highlight your technical skills by showcasing a variety of media (as applicable) to include drawings, 2D and 3D illustrations that demonstrate your understanding of spatial conventions.
- Showcase any relevant experience you had with software and tools used in the architectural field. [we are not looking for perfection, but rather interested in your willingness to learn]
11. Presentation quality

- Pay attention to the presentation quality of your portfolio.
- Ensure high-resolution images, clear annotations, and a consistent graphic style that reflects your attention to detail.
- Avoid overcrowding your portfolio slides/pages with a lot of images [white space has its beauty in balancing the page composition and showcase the strengths of your work]

12. Personal style &
expression

- Showcase your personal design style and architectural/artistic language.
- Use your portfolio as a platform to express your unique approach and aesthetic preferences.

13. Curiosity and research

Illustrate your curiosity and research skills by incorporating any investigations, studies, or explorations related to architectural theories, historical influences, or contemporary trends.
14. Declaration

As part of the submission process for the BA (Hons) Architecture program at the York School of Architecture, University of York, we kindly request that you include the following declaration in your portfolio. This declaration is crucial to ensuring the authenticity and originality of the work presented:

Portfolio Declaration of Originality

I, [Your Full Name], declare that all the work included in this portfolio is entirely my own. I affirm that I have not used the work of others without proper acknowledgment, and any collaborative projects have been duly credited. I understand the importance of maintaining the highest standards of academic integrity and ethical conduct.

By submitting this portfolio, I confirm that:

The design concepts, drawings, models, and any other representations of architectural work are the result of my individual efforts and creative input.
Any references to external sources, including but not limited to research findings, images, or ideas, have been appropriately cited in accordance with academic standards.
The collaborative aspects of group projects are clearly identified, and credit is given to the respective contributors for their contributions.
I am aware that any violation of academic integrity may result in consequences as outlined by the University’s policies on plagiarism and dishonesty.
I understand the significance of this declaration and take full responsibility for the content presented in my portfolio.

Signature: [Your Signature]
Date: [Date of Submission]

Please ensure that the signed declaration is included in your portfolio submission. This commitment to originality is essential in maintaining the credibility of your application.

If you have any questions or concerns regarding this declaration, please do not hesitate to contact us.
15. Portfolio submission

Please send your digital portfolio to ysa-enquiries@york.ac.uk one week before your interview date [or by the deadline noted in the email, if different].

Your digital portfolio should be submitted as a single PDF file of no more than 20MB, with a file name in the following format:

**UCAS ID number_ First Name_Surname**, for example

1234567899_John_Smith

**Important:** by submitting your portfolio you confirm that all work is your own unless you have indicated otherwise directly adjacent to the work (for example, including an artist’s original piece as inspiration or development). See guidance notes above.
16. Following submission

We will review your digital portfolio in advance of your interview, and it will form the basis for the interview discussion.

Once we have made a decision, we will update your application status via your UCAS Hub account.
