The Centre for Health Economics (CHE) is offering a 10-week internship funded by The National Institute for Health Research (NIHR). The internship is aimed at the brightest undergraduates in quantitative subjects, such as mathematics, economics & physics, for the summer following the second year of their degree (or third year of a 4-year degree). The internship provides a high-quality and stimulating research training experience, supporting the intern to make plans for a future career in health research.

The intern will be involved in a range of research projects such as technology appraisals for the National Institute for Health and Care Excellence (NICE) and NIHR-funded economic evaluations including activities such as literature review, cost analysis and data analysis. The successful candidate will be allocated a dedicated training and research allowance of £1000, and will be supported by James Altunkaya, a NIHR Research Methods Fellow based at CHE. Candidates can expect to be given the support needed to consolidate and further develop their research and analytic skills.

The intern will be based in the research Team for Economic Evaluation and Health Technology Assessment (TEEHTA) at CHE and will benefit from working alongside a large research team, taking part in departmental seminars and activities. The team works across a wide range of research areas, including clinical trials, public health, social care & global health. Further details of our current research projects are here: https://www.york.ac.uk/che/research/teehta/.

Hourly rate: £9.45 per hour (37 hours per week). Based at the Centre for Health Economics, University of York, Heslington, York, YO10 5DD.

Eligibility

To be considered for this post evidence of excellent performance in a quantitative degree subject is required, preferably from relevant undergraduate tutor(s). Please provide names of relevant tutor(s).

Candidates require strong communication skills, analytic capabilities and an eagerness to learn.

Candidates must have permission to work in the UK already in place.

Application process

Send your letter of application, explaining the reason why you are applying and how your profile would fit this post, and CV to Kay Fountain (kay.fountain@york.ac.uk) no later than 5pm on Thursday 28th February 2019.
Shortlisted candidates will be interviewed on 2\textsuperscript{nd} April 2019 and the successful candidate should start no later than 15 July 2019.

Environment

The Centre for Health Economics (CHE), at the University of York, is a world renowned research institute that produces policy relevant research and innovative methods that advance the use of health economics to improve population health. Difficult decisions have to be made on a daily basis, including the choice of treatments provided; the way the health and social care system should be organised, paid for and monitored; how to reward the workforce; the role of patients and the public in the health and social care system. CHE’s research is designed to provide analytical frameworks and evidence to support these sorts of decisions. Over three decades CHE has influenced UK health policy, gaining the Queen’s Anniversary Prize in recognition of this work.

Further details are here: https://www.york.ac.uk/che/

CHE has an Athena SWAN bronze award in recognition of our work on gender equality and our Equality and Diversity committee develop and monitor all our working practices to ensure a fair and inclusive environment which is welcoming to all staff and students.
