Smithson Tennant Celebration: Scientific Symposium

Os

Wednesday 30 November 2011

1.30pm—6pm

Department of Chemistry,
University of York

**November 2011 marks the 250th anniversary
of the birth of Smithson Tennant**

Smithson Tennant was born in Selby, North Yorkshire, from modest beginnings he went on to:

- Discover iridium and osmium
- Hold the 1702 Chair of Chemistry at Cambridge
- Be elected a Fellow of the Royal Society
- Win the Royal Society's Copley Medal
- Become a confidante of many of Europe's well-known scientists.

Ir

The event is sponsored by:

Os

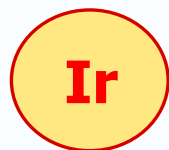

Johnson Matthey Catalysts, BP Plc,
The Royal Society of Chemistry
(Dalton Division and Central Yorkshire Section)
& The University of York

International Year of Chemistry

Programme

13.30 Registration

14.00 Introduction to Symposium:
David Lewis

Session 1: Chair Robin Perutz (York)

14.15 **Luisa de Cola** (Muenster)
*Iridium complexes for electroluminescent
devices and their soft and crystalline
assemblies*

15.00 **Luis Oro** (Zaragoza)
*Iridium complexes with basic phosphines:
organometallic processes to catalysis*

15.45 Refreshments

Session 2: Chair Bill Griffith (Imperial College)

16.15 **Anna Peacock** (Birmingham)
*Design of Osmium Arene Anticancer
Complexes*

16.45 **Tim Donohoe** (Oxford)
*Osmium inspired adventures in synthesis
and catalysis*

17.30 **Simon Duckett** (York)
*Iridium: from catalysis to diagnosis
through magnetic resonance imaging.*

18.00 Closing Remarks followed by Drinks
Reception
