## Activity Sheet 3: Space scientists Martian soil studies

| ✓ Yes or X No                      | A | В | С |
|------------------------------------|---|---|---|
| Red-brown colour                   |   |   |   |
| Feels like talc or<br>flour        |   |   |   |
| Range of particle sizes            |   |   |   |
| Contains salt                      |   |   |   |
| Lets water pass<br>through quickly |   |   |   |
| Acidic                             |   |   |   |

| We think sample | is most like Martian soil because |
|-----------------|-----------------------------------|
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
|                 |                                   |
