

Bubble challenge

We need a good bubbles recipe

Can
you
devise
one?

OUR METHOD

- We use washing-up liquid and water
- We will use glycerine if proved to be worthwhile
- We use as much water as good bubbles allow

When you have discovered the ideal mixture you must convince our directors that you have the best product

They will want to know...

- How you carried out your tests and made the test fair
- How you tested each bubble mixture you made
- What your results were
