STRUCTURE OF THE DISTANCE LEARNING PROGRAMMES

Module 1
Basic Economic Concepts

Module 2
Health Economics: Concepts and Analysis

Module 3
Introduction to Health Care Evaluation

Module 4
The Economics of Health Care Systems

Module 5
Statistics for Health Economics

Module 6
Further Topics in Economic Evaluation

Module 7
Assessing the Impact of Medical Technologies on Health

Module 8
Outcome Measurement and Valuation

Module 9
Decision Analysis for Health Technology Assessment

PG Certificate

PG Diploma

MSc
Structure of Module 2: *Health Economics: Concepts and Analysis*

Unit 2.1  
Is Health Care Different?

Unit 2.2  
The Determinants of Health

Unit 2.3  
Risk and Insurance

Unit 2.4  
Demand: Consumer Incentives

Unit 2.5  
Supply: Provider Incentives

Unit 2.6  
Equity in Health and Health Care
Academic members of the Programme Team:

Martin Forster, Programme Leader, PG Certificate and PG Diploma in Health Economics for Health Care Professionals, Department of Economics and Related Studies
Helen Weatherly, Programme Leader, MSc in Economic Evaluation for HTA, Centre for Health Economics
Stuart Bell, Dean, Faculty of Social Sciences
Andrew Jones, Professor of Economics, Department of Economics and Related Studies
Subir Chattopadhyay, Chair, Graduate School Board, Department of Economics and Related Studies
Mark Sculpher, Professor of Health Economics, Centre for Health Economics
Matthew Taylor, Director, York Health Economics Consortium

Thanks also to the following peer reviewers for this module:
(Affiliations correct at time of review):

Martin Brown, Pfizer Limited
Paul Contoyannis, Department of Economics and Related Studies, University of York
Maria Goddard, Centre for Health Economics, University of York
Richard Little, NHS Executive Eastern
Antonella Morga, Department of Economics and Related Studies, University of York
Nigel Rice, Centre for Health Economics, University of York
Luigi Siciliani, Department of Economics and Related Studies, University of York
Peter Smith, Centre for Health Economics and Department of Economics and Related Studies, University of York
Andrew Street, Centre for Health Economics, University of York
Peter West, York Health Economics Consortium

A special thanks goes to the students of the 2000 - 2018 academic years for their comments on previous versions of this workbook.

This workbook is produced using \LaTeX at the Department of Economics and Related Studies, University of York. Sincere thanks to all of those who make this software and the associated packages freely available.

2.17 Concentration curve for health. .................................. 138
2.18 Horizontal inequity in health care use. ......................... 140
List of Tables

2.1 Usage of medical services according to insurance plan 78
2.2 Predicted probabilities of episodes of care 80
2.3 Risk of dying index as a function of insurance plans 81
2.4 A framework for supplier-induced demand 86
2.5 Level of service provided by doctors by payment method 109
2.6 Progressivity indices for sources of health care finance 136
2.7 Measures of income-related inequity in health 139
2.8 Measures of horizontal inequity in the delivery of health care 142
Guide to Module 2

Learning aims and objectives

This is a Level 7(M) module and is compensatable in certain circumstances. Please refer to the Programme Handbook, section 4, for full details.

Learning aims

To introduce you to the basic concepts and methods of analysis used in health economics and to show why they are relevant for health and health care.

Learning objectives

Upon successful completion of the module you should be able to:

- Explain, from an economic perspective, what is special about health care.
- Explain, and be able to give examples of, the factors that influence the demand for health care and how those demanding health care respond to incentives in different types of health care system.
- Explain, and be able to give examples of, the interactions between supply and demand in different health care systems and the implications for efficiency and for equity.
• Critically appraise case studies that illustrate the concepts that are covered in the module. Explain the policy relevance of these applications.

In addition to these, you should ensure you can meet the learning objectives outlined at the start of each unit.

## Credits, timing and assessed work

The module is worth **20 credits** and should take approximately **200 hours** to complete over **12 weeks** of study, including the module assessment (see below). The following is a guide to the amount of time you might spend on each unit, although you are of course free to fit your study time to your own circumstances.

• week commencing 14/1/2019. Week 3. Unit 2.2.

• weeks commencing 21/1/2019 and 28/1/2019. Weeks 4 and 5. Unit 2.3. Assessed work piece 1 (deadline Monday 28/1/2019).

Module assessment

The two pieces of assessed work, to be submitted on or before the dates detailed above, are taken from previous years’ examination papers, copies of which are available in Yorkshire’s ‘Content area’ for Module 2. They are:

Please note that programme staff are under no obligation to mark assessed work that is submitted late - this applies to all modules.

The summative assessment for this module is by unseen written examination completed in the final week. Please read the Programme Handbook carefully for the regulations regarding assessment and award at Postgraduate Certificate level.

On-line learning: Yorkshire

The module is supported by the Yorkshire virtual learning environment located at:

vle.york.ac.uk

You can access this using your username and password which are supplied separately. Exercises which should be discussed on Yorkshire are flagged in the text with the computer icon.
Reading

For the benefit of those returning to the PGCert from previous years, we repeat the advice about reading that is contained within the Module 1 workbook for 2018-2019:

The main teaching materials are contained within this workbook. References to books and papers are noted in this workbook by the book icon. These may be ordered from the University of York’s library. If you work in the NHS, your local professional librarian may prove helpful.

The following textbook is supplied to you to accompany your study:

Although this textbook is quite ‘U.S.-orientated’, it contains some good introductory material for this module and more advanced material that will be referred to in later modules, especially Modules 2 and 5. For those of you unfamiliar with the ‘jargon’ of health economics, Folland et al. contains a useful ‘Glossary’ at the back.

In the ‘reading’ sections of this workbook, the first set of page numbers refers to the ‘8’ edition, the second set (in [ ] ) to the ‘7e’ edition and the third set (in ‘( )’) to the ‘7’ edition.
