The electronics industry has revolutionised life in the last few decades, and continues to push the boundaries of the physical world to produce faster, more powerful and more cost-effective technologies that enable products such as personal computers, mobile phones and the Internet. This programme provides a solid core of knowledge in the discipline, allowing students to choose specialist options for deeper study later in the degree, providing considerable flexibility for you to develop your subject-specific knowledge according to your own developing interests.

Electronics is an exciting and fascinating world of large-scale projects with ever-increasing demands for solutions and innovation. To succeed in such an environment, graduates need to be knowledgeable, highly-skilled, professional and adept at communication and project management. Drawing on the expertise of the teaching and research staff at York, and including individual and group projects at every stage of the degree to develop practical, organisational, management and business skills, this programme will provide you with precisely the abilities and approaches you will need to operate with confidence – as a researcher, expert designer or technical manager – in the challenging world of Electronics.

The final year of this Masters-level programme extends the Bachelors (BEng) programme by providing an opportunity for further engagement with research staff, technology and literature. Students will manage a large-scale individual project, and extend their knowledge and experience in a variety of core and optional topic areas; together these opportunities allow you to develop the knowledge and skills required to take a leadership role in pushing forward this specialist subject area.

As with all our undergraduate degrees, the MEng Electronic Engineering is fully accredited by the Institute of Engineering and Technology, and satisfies the educational requirements for becoming a Chartered Engineer.
Programme Learning Outcomes

Our undergraduate programmes are based around a shared set of six Programme Learning Outcomes (PLOs). These consist of four major areas, which are developed throughout each programme:

A. **Knowledge** – understanding & processing information about the subject (PLO1)

B. **Engineering Application** – using knowledge to create and modify solutions to real-world problems (This alone consists of 3 separately identifiable Programme Learning Outcomes (PLOs): PLO2: Engineering Analysis; PLO3: Engineering Design; PLO4: Practical Skills.

C. **Communication** – explaining concepts and results to other people (PLO5)

D. **Management & Graduate Skills** – professional self and group organisation (PLO6)

After completing the programme, graduates will be able to:

<table>
<thead>
<tr>
<th>Area A: Knowledge</th>
<th>Conduct research in applied electronic engineering and computing to advance the state of knowledge in algorithms, devices and systems.</th>
<th>PLO1 Subject Knowledge</th>
</tr>
</thead>
<tbody>
<tr>
<td>Area B: Engineering Application</td>
<td>Extract and critically evaluate data from complex systems through analytical and computational methods and modelling.</td>
<td>PLO2 Engineering Analysis</td>
</tr>
<tr>
<td></td>
<td>Create innovative and optimised designs to address real-world problems by synthesising ideas into engineering specifications.</td>
<td>PLO3 Engineering Design</td>
</tr>
<tr>
<td></td>
<td>Apply professional skills of programming, CAD, construction and measurement, combined with an understanding of engineering systems and components, to solve technically challenging problems.</td>
<td>PLO4 Practical Skills</td>
</tr>
<tr>
<td>Area C: Communication</td>
<td>Debate, defend and contextualise information in a succinct and technically accurate manner for audiences of engineers and members of the public, and to write and interpret technical documentation.</td>
<td>PLO5 Technical Communication</td>
</tr>
<tr>
<td>Area D: Management &amp; Graduate Skills</td>
<td>Proficiently manage themselves, teams and complex projects in preparation for technical careers as leaders in applied electronic engineering.</td>
<td>PLO6 Management &amp; Personal Development</td>
</tr>
</tbody>
</table>
