Introducing Mr Smith's foot

- Ulceration to plantar aspect of 2nd metatarsal head
- Painless
- Deep – extending to joint capsule but not bone
- Moderate surrounding inflammation and exudates
- Maccerrated callus surrounds wound edges.

Discussion task 1 – What immediate care and assessment does Mr Smith need?

Discussion task 2 – What referrals are necessary for Mr Smith?

Assessment –

First impressions last a lifetime

- Palpation of foot pulses
- 10g monofilament
- Appropriateness of footwear
- Visual inspection for foot deformities
(NICE 2004)

Management –

How long until you know the relationship will work?

Padding and Strapping

- Plaster models – design a pad.

V

Dressings - task

- Plaster models - Choose a dressing to apply.
- Debate dressing choices...

Thank You!
