Module Title | Acute & Complex Adult Care
---|---
Module Code | HEA00099H
Module Level* | 6 (H)
Word Limit /Exam Duration | 3 hours
Assessment Type(s) | Closed examination

Marking Criteria
Guidelines should be read in conjunction with the marking criteria guidance for the module level* noted above: [http://www.york.ac.uk/healthsciences/student-intranet/exam-assess/markgrid/](http://www.york.ac.uk/healthsciences/student-intranet/exam-assess/markgrid/)

Confidentiality
It is a breach of confidentiality to disclose any personal information about a patient, service user, colleague, staff or any other person or place that could in principle enable them to be identified. For further guidance please refer to the departmental policy on Confidentiality at the following link: [www.york.ac.uk/healthsciences/student-intranet/exam-assess/conduct/confidentiality/](http://www.york.ac.uk/healthsciences/student-intranet/exam-assess/conduct/confidentiality/)

Assessment Timing
The deadline for correctly presenting a submission is 4.30pm on the published submission date. The submission deadline is published on the Programme Assessment Schedule available on the following link: [http://www.york.ac.uk/healthsciences/student-intranet/timetables/assessment-schedules/](http://www.york.ac.uk/healthsciences/student-intranet/timetables/assessment-schedules/)

Referencing
You must reference your work in accordance with departmental referencing guidelines which you can access via the following link: [http://www.york.ac.uk/integrity/harvard.html](http://www.york.ac.uk/integrity/harvard.html)

Assessment Guidance

**Formative – examples of exam questions**
You will have the opportunity to review and discuss example exam questions with peers and the module team.

Additionally, the module culminates in a simulated practice exercise in which students are required to take part, towards the final weeks of the module. The exercise will focus on specific concepts of the module and look at how the students can apply these using ‘real life scenarios’ in an acute practice setting.

The themes related to the learning outcomes of the module will consider:
- Care coordination
- Communication
- Team work and delegation
- Problem solving
- Patient assessment and clinical decision making
- Time management

**Summative – closed examination**
This is a closed examination, consisting of short-answer and detailed questions relating to one case study.

The case study will be a scenario, similar to those discussed throughout the module. Some questions will test generic concepts and themes discussed within the lectures and seminar sessions. Further questions will examine the students understanding of pathophysiology in response to acute illness and injury and relate to the assessment, management and care of acute and complex conditions.

- Marks for each question will be highlighted on the exam paper.
- All questions should be attempted.
