Assessment Guidance

**Assignment Title**
This anonymised clinical case study will focus on one physical or mental health condition. Discuss one commonly used clinical guideline for that condition, briefly outline the pathophysiology of the condition, and highlight the potential needs of the patient/client. Discuss the role and responsibilities of the Nursing Associate in contributing to meeting the care needs of the patient/client in relation to the chosen guideline.

**Assessment Guidance**
- Choose a clinical case from a recent practice placement and provide a brief outline of the patient/client and their condition – put this in the appendix of the case study.
- Give a brief introduction outlining the chosen condition and the underlying pathophysiology of the condition.
- Outline the key physical, psychological and social needs a patient/client with this condition may experience.
- Discuss one commonly used clinical guideline associated with the condition.
- In implementing the clinical guideline chosen, consider your role and responsibilities as a Nursing Associate in meeting the care needs of the patient/client (NMC, 2018).
- Outline how in your role as Nursing Associate you would respond to changes or concerns regarding the patient/client.
- Your discussion must be informed by relevant literature and policy.

**Formative Support**
To assist you in developing your report, you will have opportunity to:
- Submit and receive feedback on a 500 word draft, outline or plan of your case study with your module team.
