**Assessment Guidance**
Practical skills and the appropriate application of knowledge will be assessed by a secondary analysis of datasets using the statistical package STATA under examination conditions.

It is an open-book exam so you may use any book, notes, or the VLE site of the module if you wish.

The exam consists of **two** questions: you are required to answer **both** of these questions for full marks. Both questions carry equal marks. Unless otherwise stated each section, within each question, carries equal marks.

All answers and comments should be written on a word document and you need to indicate clearly the question you are attempting.
