

Undertaking Clinical Trials in Trauma and Orthopaedics

20th – 21st November 2017, York

BOA Orthopaedic Surgery Research Centre (BOSRC) is running its third meeting for trauma and orthopaedic surgeons interested in getting involved in Randomised Controlled Trials (RCTs) or research grant applications, either as a chief investigator or as a co-applicant.

The programme for this event will focus specifically on issues relevant to RCTs in trauma and orthopaedics.

Presenters will include Professor David Torgerson, Director of YTU; Professor Catherine Hewitt, Senior Statistician; Dr Catriona McDaid, Senior Research Fellow; Professor Amar Rangan, Consultant Orthopaedic Surgeon and other key members of York Trials Unit who have been involved in several orthopaedic trials.

What will you get from this event?

- A mixture of lectures and workshop activities
- An understanding of the design and analysis of randomised controlled trials
- An overview of planning, costing and delivery of a trial
- Planning public involvement in grant applications and trials
- The opportunity to network with colleagues
- An opportunity to talk to experienced trialists and methodologists and get feedback on your research ideas

Booking a place

Registration is £45 for one day and £90 for two days. To get the most from the event we encourage applicants to attend both days. Accommodation will not be provided.

There will be a conference dinner on the evening of 20th November at a local restaurant at a cost of £25.

To book your place visit <https://tinyurl.com/2017bosrc> or contact Sally Baker (sally.baker@york.ac.uk)

**UNDERTAKING CLINICAL TRIALS IN TRAUMA AND ORTHOPAEDICS
20th-21st NOVEMBER 2017, UNIVERSITY OF YORK**

DRAFT PROGRAMME	
9.00 Registration and Coffee	
DAY 1	
Developing a Research Question	<i>Topics:</i> PICO, pragmatic, effectiveness, efficacy, feasibility questions, pilot studies
Ground Work for a New Trial	<i>Topics:</i> establishing evidence gap, establishing importance, feasibility
Managing a Trial	<i>Topics:</i> role of Chief Investigator, trials unit monitoring, trial steering committee, data monitoring committee
Dragons' Den	Presentation and discussion of research ideas
CONFERENCE DINNER	
DAY 2	
Overview of Study Designs	<i>Topics:</i> efficient study designs, simple designs, adaptive designs, cluster RCTs
Statistics for Clinical Trials	<i>Topics:</i> sample size, randomisation, key principles of analysis, developing an analysis plan
Public Involvement in Trials	<i>Topics:</i> approaches to establishing meaningful patient involvement
Costing a Trial	<i>Topics:</i> schedule of events, project plan, research costs, NHS support costs, excess treatment costs
Recruitment and Retention	<i>Topics:</i> evidence based recruitment and retention
16.30 Close
