

Global Health Histories Seminar 116:

Antimicrobial Resistance

A global spread: thinking and acting beyond antibiotics

Date: 13:00 on 30 January 2019

Panellists: Janis Lazdins Helds (formerly TDR/WHO)

Jens Seeberg (Aarhus University)

Venue: Mødelokale 2 / Conference room 2,
Studenternes Hus, Frederik Nielsens Vej 4, 8000 Aarhus C.

Antimicrobial Resistance (AMR) is a global health threat affecting all nations. Some see new antibiotics as the solution to the problem, but there needs to be a shift towards better understanding how resistance develops, evolves and transmits between bacterial species and amongst humans. This seminar brings together natural science and social science/humanities perspectives on AMR to explore these issues and consider the ways forward.
