

The New Historical Linguistics and the Use of Annotated Corpora

9-13 March 2015; Unicamp, Campinas, Brazil

Programme for poster sessions and presentations by ECRs**Monday 9 March 2015****10.15-11.15: Poster session**

1. Aroldo Andrade, University of Campinas: *Contrastive left-dislocation in Middle French and Middle Portuguese*
2. Maria Luisa Freitas, University of Campinas: *An experimental and quantitative study on nominalizing suffixes in Brazilian Portuguese*
3. Aaron Eday, University of York: *Investigating the history of English do-support using automatically annotated corpora*
4. Pablo Faria, University of Campinas: *Inconsistency detection in syntactically annotated corpora*
5. Thomas Daniel Finbow, University of São Paulo: *The reconstruction of Proto-Arikém*
6. Maria Cristina Micelli Fonseca, Federal University of São Paulo: *Anaphora resolution in PBL2: an online experiment*

11.15-12.45: Presentations

1. Rhona Alcorn, University of Edinburgh: *Exploring historical corpus phonology*
2. Laura Bailey, University of Kent: *Questions about questions*
3. Miriam Bouzouita, University of Cambridge: *Exploring the left periphery using the Biblia Medieval Parallel Corpus*
4. Marcelo Concário, State University of São Paulo: *Guidelines for assessing speaking and writing in content-based language learning: elaboration, use and effects on language awareness*
5. João Paulo Lazzarini Cyrino, University of São Paulo: *A typology for the passive-reflexive syncretism*
6. Nina Radkevich, University of York: *Issues in Nakh-Dagestanian (North-East Caucasian) morphosyntax*

14.00-15.30: Presentations

1. Timothy Feist, University of Surrey: *Investigating the role of gender and classifiers in reference tracking*
2. Nathan W. Hill, School of Oriental and African Studies: *Current progress in Tibetan NLP and corpus linguistics*
3. Irimia, Monica Alexandrina, University of York: *Differential objects - morphosyntactic strategies*
4. Caitlin Light, University of York: *Speculations on information structural research using corpora*
5. Laurel MacKenzie, University of Manchester: *Variation and change within the individual*
6. McGillivray, Barbara, Oxford University Press: *Verbs in corpora, lexicons ex machina: computational methods for Latin and Ancient Greek*

Tuesday 10 March 2015

10.15-11.45: Presentations

1. Dimitris Michelioudakis, University of York: *Applying the PCM to the indigenous languages of South America: challenges and prospects*
2. Marcello Modesto, University of São Paulo: *Inflected infinitives and the history of BP*
3. Cristina Martins Fargetti, State University of São Paulo: *Numerals in Juruna*
4. Glauber Romling Silva, University of Campinas: *Some experiences on documentation projects in Amazonia*
5. Jennifer Thorburn, University of Newcastle: *Language shift and dialect development: English in Canadian aboriginal communities*
6. Joel Wallenberg, University of Newcastle: *Science of the experimentally possible: very slow change and language technology*

14.30-16.00: Poster session

1. Paulo Jeferson Pilar Araújo, University of São Paulo: *A possible annotated corpus of Portuguese and Kimbundu as contact languages*
2. Janderson Lemos de Souza, Federal University of São Paulo: *The history of BP prepositions*
3. Marcello Marcelino, Federal University of São Paulo: *Parametric issues and second language acquisition*
4. Cristiane Namiuti-Temponi, University of SouthWest Bahia: *New challenges for ancient sources: an important dialogue between Computer Science and new Historical Linguistics*
5. Livia Oushiro, University of São Paulo: *Studying São Paulo Portuguese: challenges and methods of a sociolinguistic study in megalopolis*
6. Eva-Maria Rößler, University of Campinas: *On differential object marking & object scrambling in Aché – Discussing morphological richness and syntactic change in Tupí-Guaraní languages*
7. Robert Truswell, University of Edinburgh: *Parallel evolution of Indo-European headed relatives*
8. Danielle Turton, University of Newcastle: *//-darkening in English: synchronic reflections of the life cycle of phonological processes*
