Physics Scholarships for Overseas Students

The Department of Physics will award up to two scholarships to overseas students for undergraduate entry in each academic year. Each scholarship is worth £1000 annually for the duration of the degree programme, subject to satisfactory academic progress. Successful applicants will be required to meet the balance of the costs of their degree.

ELIGIBILITY
If you are applying for any of our Physics degree programmes (excluding joint degrees with Mathematics), and are liable to pay overseas fees, you are eligible to apply.

APPLICATION PROCEDURE
Scholarship applications should be made on the Physics Overseas Students Scholarship application form. Scholarship applications will only be considered from those who have already applied to the Department through UCAS.

Completed application forms should arrive at the University no later than 30 June but candidates should apply as early as possible. Late applications may not be considered.

Decisions will be made as soon as possible after the closing date. If a candidate’s admission to the course is dependent on examination results that are not known until a later date, the award of a scholarship will be conditional on meeting the admissions criteria.

SELECTION
A Departmental Committee is responsible for the selection of award-holders. The Committee will consider each applicant’s academic achievement and potential for academic success, as well as his or her financial circumstances.

RENEWAL OF AWARDS
A scholarship will normally be renewed each year for the duration of the course, subject to satisfactory academic progress and attendance.

TERMINATION OF AWARDS
A scholarship may be terminated at any time due to unsatisfactory progress or attendance, or if an award-holder ceases to be a registered student of the University.
