York Researcher Professional Development
& Skills Programme 2021/2022

UNIVERSITY
of York
York Researcher Professional Development & Skills Programme 2021/2022

We are the Building Research and Innovation Capacity (BRIC) team, and we deliver & coordinate a comprehensive programme of professional development and skills training, for all Researchers at The University of York. Specialist training in research methods is typically provided by your Department and/or Doctoral Training Programme (DTP) for PGRs.

For Postgraduates (PGRs - PHDs and Masters by Research), we offer training via SkillsForge, which keeps track of your training record. This, along with your Personal Development Plan (PDP), feeds into your Thesis Advisory Panel (TAP) & meetings with your supervisor(s).

For Staff Researchers (Postdocs and above), we offer training via the Learning Management System (LMS).

Our 21/22 programme of training sessions is shown on the following two pages. To book, or to find out more information, simply click either the ‘PGR’ or ‘Staff’ links next to each respective course, which will then take you to the booking page for that session.

Follow us on Twitter, or see the YGRS blog for updates throughout the year.

Our training is focused around five key themes:

Professional Development & Employability
Partnerships, Collaborations & Civic Engagement
Public Engagement & Communication
Research Management & Leadership
Community & Wellbeing
