Knowledge Exchange News 14

Publication of Knowledge Exchange Framework (KEF 3)

Each segment below shows the relative strength of the selected provider for each KEF perspective, compared against the average for the cluster they are a member of (as denoted by black quintile line). Tap or hover over a segment to show the links to the dashboard for each perspective. Segments are displayed using quintiles; for example, a segment that reaches the outer edge of the chart shows that the selected provider has very high engagement (quintile 5) for that perspective.

Institutional Context

The University of York is a research intensive university with over 19,000 students and more than 4000 staff. Whether developing new drugs and technologies or delivering in cultural and social activities we believe that partnerships between the University, public sector, civic and business organisations are essential for ensuring that University research can be used to generate economic, social, environmental and cultural benefits. Across the University, we work collaboratively with external organisations to mobilise our knowledge, our people and our resources to co-produce solutions that help tackle the immediate and long-term challenges faced locally, regionally, nationally and internationally.

Who are Cluster X?

Large, high research intensive and broad-discipline universities undertaking a significant amount of excellent research Much of research funded by UKRI and other government bodies; 8.5% from industry Discipline portfolio balanced across STEM and non-STEM although less clinical medicine activity. Large proportion of taught postgraduates in student population.

Research England released the latest Knowledge Exchange Framework results on Wednesday 27th September and these are available on the KEF's interactive website.

The KEF is an institutional-level exercise which provides performance information about universities' knowledge exchange activities. The KEF is published annually to allow universities to better understand and improve their own performance in knowledge exchange. It is a powerful tool to describe the breadth of scope of knowledge exchange. It

also provides important evidence of different university strengths through peer group comparisons.

If you're new to the KEF dashboards, take a look at the About the KEF page for further background information and guidance on how to make the most of the data dashboards.

University of York Highlights

York's performance is 'High' or 'Very High' in five of the seven performance areas. In Public and Community Engagement, the University of York has increased its performance since the second iteration, which is now in line with the cluster average. The University's <u>full narrative elements</u> and all other institutions' data can be accessed via the *KEF dashboards*.

The University of York is passionate about engaging diverse communities to increase the positive impact of its research beyond academia through a wide range of activities. These include participation in research and its co-design and co-production, open lectures, consultations, festivals

and exhibitions, networking, and training and development. The KEF is one way by which our KE activities, to support this ambition, can be evidenced.

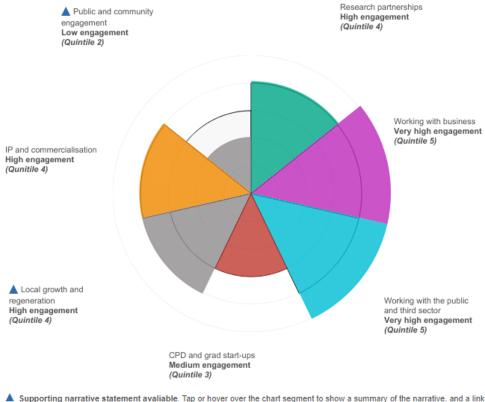

If you are interested in finding out more about the KEF, the underlying data and future plans then there are two blogs available, one by *Ellen Bamford*, Head of KE Data and Evidence at Research England and the second by *The Higher Education Statistics Agency* (HESA).

Supporting narrative statement available. Tap or hover over the chart segment to show a summary of the narrative, and a lint to the full version.

Institutional Context

Whether developing new drugs and technologies or engaging in cultural and social activities the University of York believes that partnerships between the University, public sector, civic and business organisations are essential for ensuring that University research can be used to benefit society and the economy.

Our values and commitment to the public good have never been more important. As well as contributing to the national widening participation landscape, our ambition is to be a major local and regional force for encouraging aspiration and achievement.

Across the University, we work collaboratively with external organisations to mobilise our knowledge, our people and our resources to co-produce solutions that help tackle the immediate and long-term challenges faced locally, regionally, nationally and internationally.
