Educational aims of the programme(s)					
For the Masters, Diploma and Certificate: The central aim of the programme is to provide high quality graduate level training in social policy, taking an international perspective and focusing on comparative analysis. This will involve students addressing the issues of how and why nations differ in terms of policy focus and provision and what they can learn from each other's policy experience (the idea of policy transfer). More specifically, the programme will consider a range of conceptual and theoretical approaches, provide a detailed understanding of policy-making, implementation, evaluation and outcomes in particular fields of social policy, and explore the impact of international					

organizations (such as the World Bank, the UN, the EU, the OECD etc) on policy decision making and its effects. The course will also offer training in both quantitative and qualitative comparative research methods.

Additionally for the Diploma (if applicable):

Additionally for the Masters:

Students completing at Masters level will also complete an Independent Study Project that will provide the opportunity to employ research skills and knowledge developed in the earlier stages of the programme. Students will also learn how to develop a range of presentational skills in how to communicate the results of their own policy research.
