

UoY App (Check In Guide)

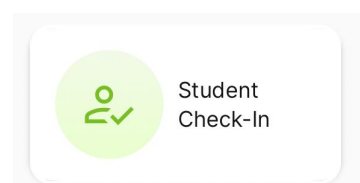

This guide gives instructions on how to access Check In via the UoY app. Please note, Check In can still be accessed via any web browser by entering the following checkin.york.ac.uk

Access instructions

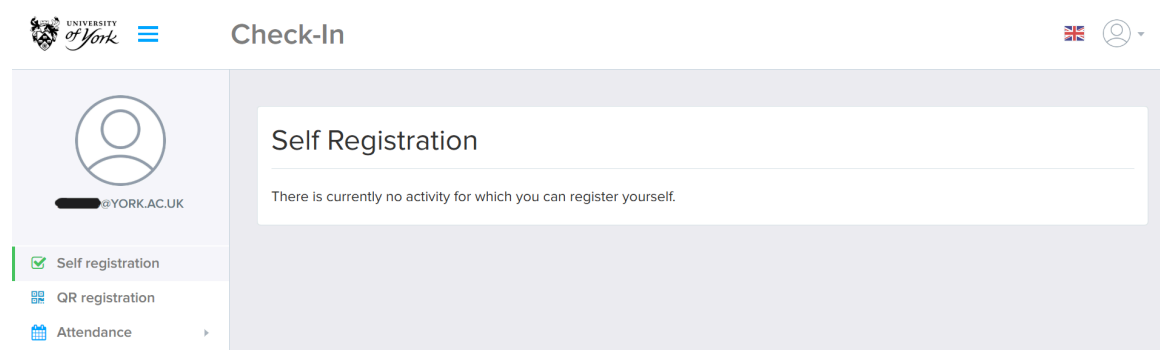

- Download the MyUoY app on your [Android](#) or [iOS device](#). (If you're an Android user and cannot access Google Play, you can [download the app another way](#).)
- Log in with your York email address and password. [Duo two-factor authentication](#) is required.

Once downloaded, open the app and on the home screen, under **Quick Links**, you will see 'Student Check In'.

Click on this, and if you are already logged into Duo, it will take you to the 'Self Registration' page in the Check In system.

What do I do if I'm struggling to check in?

Please speak to your lecturer or a member of the departmental admin team in the first instance for further guidance. For example, staff are able to check-in students where students may be struggling to do so themselves.

If you have any further questions you can email check-in-support@york.ac.uk
