**The Role**

1. To what extent did you enjoy your work placement or internship?

My time at Mace was thoroughly enjoyable! I was working on-site for the majority of the year where the environment was lively and filled with individuals who understood when to have a laugh and when to focus on work. From day one I was made to feel a part of the team and I was able to contribute towards the project on which I was working directly within the first couple of days. Mace as a company have a vast range of projects on which you may work, each with a different and exciting element from which you can build your knowledge; some of the types of projects I've seen placement students on include residential skyscrapers, airport terminals, football stadiums and retail fit-outs.
