PERSONAL STATEMENT

Second year Biology student at the University of York with strong analytical, problem solving and communication skills, currently looking for a work placement. Motivated, honest and friendly, with experience of working with children and young people, and currently publicity officer for the Juggling Society. In my spare time I also enjoy cooking for friends and playing badminton. I am looking for a work placement that will allow me to apply the skills and knowledge I have been gaining in my degree in the workplace.

SKILLS PROFILE

Communication

- Learned to deal with customers tactfully and diplomatically through paid and voluntary work and can work effectively with people from a range of backgrounds, abilities and ages.
- Developed excellent presentation skills from giving individual and group based presentations at seminars;
- Communicated scientific information in a creative way by making a poster presentation about a group project

Team Work

- Worked regularly as part of a team for degree course projects and lab practicals
- Collaborated with staff and youth club users to organise activities
- Committee member for the Juggling Society; regularly attend meetings to discuss and plan future activities.

Problem Solving

- Developed strong analytical and problem solving skills through my course
- Regularly found solutions to customers' problems in a calm and efficient manner when working at SaveMore.

Computing/Admin

- Competent user of Microsoft Office and PowerPoint. Regularly use the internet for research
- Administrative skills including reception, switchboard, drafting correspondence and filing.
