

YCCSA Seminar Series Spring 2018

An interdisciplinary seminar series hosted by the York Cross-disciplinary Centre for System Analysis aimed at researchers from all disciplines

The TRANSIT Process: experiences in cross-disciplinary and co-creation in research

**Dr Leo Caves (Biology) and
Professor Susan Stepney (Computer Science), York**

19 January, 2018
Ron Cooke Hub, RCH/204 at 13:30

Abstract:

We will give an overview of the three stage TRANSIT process for promoting and deepening interdisciplinary research that was developed within YCCSA, originally supported by an EPSRC Bridging the Gaps award. We will give examples of past and current activities, and reflect on both successes and failures and how these have influenced the shape and culture of interdisciplinary research in YCCSA and beyond. We will share some ideas about more intentional research on how to promote effective interdisciplinary interactions, and open up discussion with the audience about possible ways to improve our understanding of cross-disciplinary working.

The seminar includes a refreshment break

***Ron Cooke Hub is on Heslington East Campus – accessible by free bus services
No. 66 and UB1 running at frequent intervals from Heslington West.
The YCCSA Seminar room is on the second floor***
