Interdisciplinary collaborations are the future of research. But how do you find suitable partners in other departments and faculties?

MILES is a new programme of events and funding opportunities to stimulate Surrey's interdisciplinary research.

We initiate and foster projects that bring together academics from mathematics, engineering, computing and physical sciences with those from the life sciences, social sciences and beyond.

To apply for MILES funding or to participate in our online Collaboration Forum and be part of our Collaborators' Directory please login/register below. Please note that registration is only open to the University of Surrey research community.

Forthcoming Events

01

FEB

[Behind the Scenes Tour - Surrey Ion Beam Centre](#)

02

FEB

[Behind the Scenes Tour - Surrey Sleep Research Centre](#)

04

FEB

[Behind the Scenes Tour - Environmental Flow Research Centre](#)

08

FEB

[Behind the Scenes Tour - Clinical Biomedical Engineering Centre \(including Gait Lab\)](#)

09

FEB

[Behind the Scenes Tour - Centre for Vision, Speech and Signal Processing](#)
