

Ageing, Health Technologies and the Built Environment

Developing a New Research and Policy Agenda

29 May 2003 11am - 5pm University of Sheffield

Aims of the meeting

- A) to bring three research programmes to the attention of different networks of senior researchers, users and policy makers.
- B) to explore the ways in which these programmes can complement each other and so improve our understanding of the relationship between ageing, the built environment/space and innovative health technologies. Such lessons would have wider value in other health domains.
- C) to determine new research agendas and policy implications for the, NHS and wider UK health regions.

Who is this meeting for?

Academic researchers, policy advisors, principal policy makers from Government, the NHS and charities.

NHS Estates Funded

Project SHIFT (Substitution Of Hospital Inpatient-Focused Technology)
Morton Warner, University Of Glamorgan

Investigation and Assessment of Attitudes To And Perceptions Of The Built Environments In NHS Trust Hospitals
